

## 6 Curing modes

Conveniently select only injection mode in Selection Mode

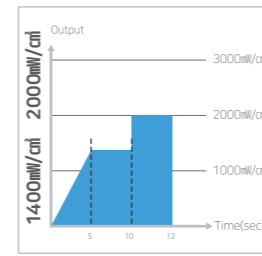

Normal 10 sec

Soft start 15 sec

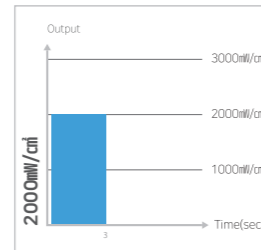

Soft start-P 12 sec

Pulse 10 sec

Turbo 3 sec

Turbo 5 sec

Aluminum exterior metal case  
(Titanium color)

OLED display & Glass window

White LED Light (7,500 Lux)

Glass fiber optic light guide  
(Dia. 8Ø, 8-8mm)

Lithium-ion battery(2,850mAh)

6 Curing modes

Maximum power 2,000 mW/cm<sup>2</sup>  
(Turbo 3 Sec & 5 Sec)

Made in Korea

### Specification

Operation voltage (Charging cradle)	DC 5V
Battery	3.65V Lithium-ion 2,850mAh
Charging time	3 Hours
Curing light source	7W Dental Blue LED
Wave length range	430nm ~ 490nm (Peak 460nm)
Output intensity ±10%	1,200 ~ 2,000 mW/cm <sup>2</sup>
Dental light source	White Chip LED
Dental light output	7,500 Lux ±10%
Dim. of hand piece	240 x 27 x 27 mm
Weight of hand piece	148g
Dia. of Glass fiber optic light guide	Dia. 8Ø 8-8mm, 3Ø 8-3mm (Standard set : 8Ø 8-8mm)

## Dual LED Curing Light

# NOBLESSE·E™

# DUALLED CURING LIGHT

## Aluminum exterior case

- Aluminum metal case to improve durability
- Titanium color anodizing to match with the metal

## OLED display & Glass window

- Easy to read display using OLED technology
- Easy to clean chemical resistant glass window

## Lithium-ion battery(2,850mAh)

- ≥1,200 times of curing(Turbo 3 Sec)

## Made in Korea

- Developed & produced in Korea

## Dental Blue & White LED

### Maximum power 2,000 mW/cm<sup>2</sup>

7W Blue Dental LED applied, maximum output 2,000 mW/cm<sup>2</sup>  
Wave length 430 ~ 490nm

### White LED Light (7,500 Lux)

Intraoral light using white LED (7,500 Lux)  
Assists to find cracks

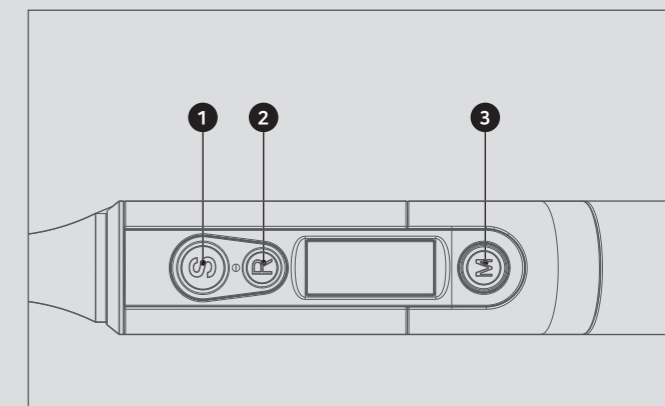

## Ergonomic Curved design

- User friendly curved handpiece provides a good grip

## Glass fiber optic light guide

- 8Ø (8-8mm) diameter allows polymerizing all tooth sizes
- 3Ø (8-3mm) diameter is convenient for polymerizing narrow and deep areas and small size teeth
- Easy to clean and replace

## Curing light menu button

- Rubber material for intuitive button configuration and easy cleaning

- ❶ S button [Shoot button] Curing light On/Off
- ❷ R button [Ready button] Intraoral light White LED On/Off
- ❸ M button [Mode button] Curing mode selection
